Key Features for Team Building

User Authentication

Firebase Auth for secure sign-up, login, and logout processes.

Team Discovery

Players can easily search for nearby teams based on location or sport.

Team Management

Tools to create, manage teams, view details, and manage members.

Additional App Features

1 **Customizable Profiles**

Users can create detailed profiles. Athletes can list skills, experience, and positions.

2 **Push Notifications**

Real-time updates for team invites, match reminders, and important announcements.

3 **Interactive Maps**

Display team locations and nearby sports facilities. Makes it easy to find training locations.

Core Features and Advantages

1 **User-Friendly Interface**

Intuitive design for easy navigation. Streamlined experience for all users.

2 **Community Focus**

Fosters local sports networks. Builds strong team connections.

3 **Efficient Team Management**

Simplified tools for team creation. Seamless member management features.

4 **Enhanced Discoverability**

Easy team and player searches. Location-based filtering capabilities.

Transforming Player Interactions

1 **Enhanced Discoverability**

Effortlessly locate nearby teams. Players can filter by sport and skill level.

2 **Simplified Communication**

Directly connect with teams and members. Streamline coordination for practices and matches.

3 **Community Building**

Join a local sports community. Find teams and teammates that share your passion.

Project Structure Overview

main.dart

Initializes Firebase and handles routing & auth state.

login_screen.dart

Implements login page UI & logic.

signup_screen.dart

Manages signup page UI & logic.

auth_service.dart

Abstracts all authentication functions.

Future Enhancements

Location-Based Filtering

Use GPS for pinpointing nearby teams.

Team Recommendations

Suggest teams based on skills/interests.

Match Scheduling

Track availability for games and practices.

Future Enhancements

Future improvements aim to enrich the app's user experience and utility.

Advanced Search

Implement detailed filtering options for team searches.

Skill-Based Matching

Connect players to teams based on skill levels and interests.

Integrated Chat

Enable real-time communication between team members.
